

The FIFe Korat Breed Council has prepared the following proposal to the FIFe LO Commission that we hope will take it into consideration and forward it to the next FIFe General Assembly that will take place in 2005

1. To the FIFe LO Commission:

Breeding and Registration Rules:

*Change to the last paragraph of article 2.6.3":*

- Korat Breeders must inform buyers of Korat cats about the GM disease and the present registration policy. They are also responsible for providing the National LO with the certified veterinarian certificate regarding the GM status of the cat.

*Paragraph to be added:*

- The National LO is responsible for collecting the GM certificates and for issuing pedigrees which carry the GM status of the cat (for instance: GM+ for carriers; GM- for non carriers).

Motivation:

In order to make the process for registration and transfer of Korat cats uniform for all FIFe clubs and to make it easier for Korat breeders to manage with certificates and pedigrees, we suggest that the GM status for the cat is clearly stated on the pedigree issued by the National LO.
